

Lab 12: Implementation of Dynamic Interior/ Exterior Routing (RIP, OSPF, BGP)

Assignment Date: August 7th, 2026

Deadline: August 17th, 2026

Class: BSc.CSIT 4th Semester, New Summit College

Subject: Computer Network

Objective: Understand the basics of Dynamic Interior/ Exterior Routing using RIP, OSPF & BGP

Tasks:

- Understand the concepts of Dynamic Interior/ Exterior Routing using RIP, OSPF & BGP and implement it in Packet Tracer.

Report Format & Structure (Topics to include for submission):

- Theory
 - a. Dynamic Interior Routing / Exterior Routing
 - b. RIP, OSPF, BGP
 - c. Network Diagram
- Implementation Sequence
 - a. Configuring Network
 - i. Configure the network for PCs and Routers
 - ii. Implementation & Explain the need for Dynamic Routing
 - b. Dynamic Routing Configuration
 - i. Using RIP Command (Include Network Diagram, Code, Steps & Testing)
 - ii. Using OSPF Command (Include Network Diagram, Code, Steps & Testing)
 - iii. Using BGP Command (Include Network Diagram, Code, Steps & Testing)
 - c. Addressing Table
- Conclusion
