Introduction to Linux
Linux is an open-source operating system.
It is widely used in servers and embedded systems.
This lab covers basic file handling commands.
Prepared for BSc CSIT, 4th semester.

CP(1)                                User Commands                                CP(1)

NAME
    cp - copy files and directories

SYNOPSIS
    cp [OPTION]... SOURCE DEST
    cp [OPTION]... SOURCE... DIRECTORY

DESCRIPTION
    Copy SOURCE to DEST, or multiple SOURCE(s) to
    DIRECTORY.

    -r, -R    copy directories recursively
    -f        force overwrite of destination

Manual page cp(1) line 1
```
