

## Lab 10: Creating VLAN and VLAN Trunking using Packet Tracer

Assignment Date: July 19<sup>th</sup>, 2026

Deadline: July 27<sup>th</sup>, 2026

Class: BSc.CSIT 4<sup>th</sup> Semester, New Summit College

Subject: Computer Network

**Objective:** Understand the basics of VLAN, VLAN Trunking & its implementation in Cisco Packet Tracer.

### Tasks:

1. Create a simple VLAN Network
2. Configure the basics and Test the VLAN Trunking

### Report Format & Structure (Topics to include for submission):

- **Theory**
  - a. VLAN, VLAN Trunking & its Architecture
  - b. Component Used
  - c. Network Diagram
- **Implementation Sequence**
  - a. Configuring VLANs and VLAN Trunking in Cisco Packet Tracer
    - i. Create VLAN on Switch 1 & Assign Port
    - ii. Create VLAN on Switch 2 & Assign Port
    - iii. Configure trunking between Switches
  - b. Testing and Validation
  - c. **Addressing Table** ( Refer to KEC Book Page no 264 for a sample)
- **Conclusion**
