

Lab 6: Static IP Configuration on Windows/Linux Machine using Command Prompt (CLI)

Lab Date: July 1st, 2026

Deadline: July 6th, 2026

Class: BSc.CSIT 4th Semester, New Summit College

Subject: Computer Network

Objective: Understand the basics of configuring a static IP address on Linux/Windows Machines.

Tasks:

1. Understand the basics of IP Address, Subnet Mask, Default Gateway, and DNS Server.
2. Configure Static IP by changing the above-mentioned topics, and verify the change implemented.

Report Format & Structure:

- Theory
 - a. Command Line Interface (CLI)
 - b. Ipconfig Command
 - c. Netsh Command
- **Implementation Sequence:**
 - a. Test the Device's Connectivity & IP using CLI
 - b. Select the Adapter that is active
 - c. Change IP Statically using CLI
 - d. Again, Test the Connectivity & IP address using LCI(Include Screenshot of Multiple Steps with details of each step)
- Conclusion
