

Lab 9: Creating different network topologies using Packet Tracer

Assignment Date: July 19th, 2026

Deadline: July 27th, 2026

Class: BSc.CSIT 4th Semester, New Summit College

Subject: Computer Network

Objective: Understand the basics of topology, Packet Tracer, and creating topologies in Packet Tracer

Tasks:

1. Understand the mechanism of creating network topologies.
2. Configure and implement different topologies.

Report Format & Structure (Topics to include for submission):

- Theory
 - a. Different Topologies
 - b. Component Used
 - c. Network Diagram of Topologies
- Implementation Sequence (**Include connection test between 2 devices in each topology**)
 - a. Ring Topology
 - b. Star Topology
 - c. Mesh Topology
- Conclusion
